Exercise 6

- Author: Mieszko Wawrzyniak 243563
- Date: 26 April 2018
- [Source code](#)

Task

Introductory classes, familiarize yourself with tools used during laboratory
from assembler programming. Running the sample program "Hello Word".

Conclusions

- In order to print string we should use static memory which in mips assembly
  is in `.data` section.
- Syscall number 4 prints string given in register `$a0`.
